High flexible high-speed pick & place machine **PANFLEX2**

Specifications

Flexible, compact pick & place machine for the efficient series fabrication, equipped with on-the-fly laser centring and X-vision system, automatic recognition of bench marks, graphical user surface, automatic recognition of feeders and 400x300mm placing space.

- Intelligent feeders
- Capacity up to 190 feeders
- Changeover without standstill time
- Multistage-conveyor with SMEMA-interface
- Placement rate up to 12,000 cph
- Smallest chip size 0201 (optional 01005)
- Height of the component up to 15 mm
- QFP/QFN/BGA up to 50x50 mm and pitch 0.4 mm
- Integrated management of the components with programmable alarm level
- Universal CAD-interface
